_____ I may wish to see this evaluation at some later point; I do not waive my right to see it.

student's signature

date

About the IAF for undergraduates:

This scholarship is available to undergraduates in Arts and Sciences who demonstrate a strong commitment to international activities in a variety of fields. Especially encouraged is international field research leading to a senior honors thesis, but other activities such as international or internationally-focused internships, assisting with faculty research overseas, or special language study will also be considered. Proposals for activities following the junior year are favored, but we will consider applications for all Arts and Sciences undergraduates (including graduating seniors). Proposals should contain a clearly stated research question or project statement, a realistic plan for use of the funds, and evidence of faculty interest and support. These grants are limited to \$500 and applicants are strongly urged to apply to other sources as well in order to meet full costs.

To the evaluator:

Please comment on the applicant's seriousness of purpose, ability to undertake and complete the proposed project, his/her level of maturity, and any other strengths and weaknesses you feel qualified to address and evaluate. Since this student may be traveling independently overseas, any comments you can make about the applicant's resourcefulness, independence and resilience will be particularly helpful.

Please attach your evaluation to this form and send it to:

Dr. Priscilla Stone in the International and Area Studies office, first floor of Stix International House, or Campus Box 1088, Washington University, One Brookings Drive, St. Louis, MO 63130 by the deadline.
